- 17. (canceled)
- 18. (withdrawn): A tripod carousel, comprising:
 - (a) a carousel adapted to rotate about an axis and adapted to support an object placed thereon;
 - (b) means for attaching said carousel to a tripod at a location that is between a pair of opposite ends of each leg of said tripod, and
 - (c) wherein when said carousel is attached to said tripod, said carousel is entirely disposed below a top of said tripod and between the legs of said tripod.
- 19. (withdrawn): The tripod carousel of claim 18 including means for providing a source of illumination, said source of illumination adapted to illuminate said object placed in said carousel.

- 29. (currently amended): A tripod stabilizer and lighted lens carousel, comprising:
 - (a) a stabilizing plate;
 - (b) means for attaching said stabilizing plate to each leg of a tripod at a location that is between a pair of opposite ends of said each leg wherein no portion of said stabilizing plate is adapted to contact a surface upon which said tripod is placed;
 - (c) means for supporting at least one lens, said means for supporting including means for attaching said means for supporting to said stabilizing plate; and
 - (d) wherein said stabilizing plate is triangular in shape and is formed of a substantially rigid material and wherein said means for attaching said stabilizing plate includes a slotted means that is provided at each apex of said stabilizing plate, and wherein each of said slotsted means is adapted to secure a first end of a tripod leg bracket thereto, said tripod leg bracket including an opposite end that is attached to one of said each leg of a tripod.
